O&M Services

Turnkey Installation

Energy Services

System Solutions

**Site:** Detroit Diesel

**Location:** Detroit, MI

**Scope of Work:** Armstrong Service is responsible for the operation and maintenance of the steam generation assets. Armstrong's site supervisor will be responsible for management of (6) on-site operators, providing energy management expertise, and developing cost reduction opportunities.

The peak steaming capabilities are 130,000 pph.

**Upgrade Projects:** Pursuant to its responsibilities, Armstrong Service provided the following upgrade projects:

- Blowdown Heat Recovery Installation
- Survey, database, repair, and replace of the Steam Trap Population
- Complete insulation upgrade installation

**Contract:** Total value of this Agreement \$650,000.

**Time of Service:** 3 year Operations and Maintenance Agreement began September, 2003.

**Benefits:** Armstrong Service provided on-site expertise that has lowered the site's operating costs, developed appropriate back-up and emergency processes, and improved the knowledge-base and morale of site operators.
